The 924 Carrera was a homologation model built to qualify the 924 model to race in Group 4. One of the great supercars of the 1980s, the 924 Carrera was considered by many to have better handling characteristics than Porsche's flagship 911. The book features interviews with many of those involved with the car at the time together with race stories, statistics, and a unique exposé of component failures during racing.

This book covers the entire history, life and times of the famous British high-performance engineering company, from its 1958 foundation by Mike Costin and Keith Duckworth, through its often-exciting and always fascinating evolution, to its expansion and worldwide success in both motorsport and high-performance road car production.

The fifth in a series of books which chronicle in definitive depth the history of the evergreen 911, from the earliest design studies to the water-cooled cars of today. This volume looks at each 911 model and its derivative, taking in the various specials and competition cars along the way.

To Boldly Go details 26 sometimes controversial vehicles, from 1911 to present, all solving different design challenges. From the Issigonis Mini that changed design and social mores, to racers so successful they were banned from competition, from cars produced in millions, to one-offs, all created by those marching to the beat of their own drum.
