A study guide for the Advanced Placement exam in human geography that provides subject reviews, two full-length practice tests, detailed answer explanations, a diagnostic test to identify strengths and weaknesses, and a CD-ROM with two additional practice tests.

Kaplan's, 5-Steps, Crash Course and the others are great resources for reviewing at the end, but Tamm's Textbook Tools accompany kids all year long. This AP Human Geography companion is filled with vocab and assignments that follow the de Blij text throughout the year, chapter-by-chapter. They can be used as regular weekly assignments or reviews. They can be used on short notice if there is a sub, or be done as homework. All you need is the textbook. Teachers can copy at will, or the book can be used as a student consumable. As publishers started putting the majority of their content online, it opened a niche for traditional paper assignments, a void this series fills. Whether the text itself is written in ink or electrons, students still need to write and keep a notebook for themselves, and portfolios still matter. These activities challenge students to apply the concepts and give examples, diagramming each chapter as it comes. As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.
