Evidence-based practice is about making better decisions, informing action that has the desired impact. An evidence-based approach to decision-making is based on a combination of using critical thinking and the best available evidence. It makes decision makers less reliant on anecdotes, received wisdom and personal experience – sources that are not trustworthy on their own.

Background and purpose: Making evidence-based practice (EBP) a sustained reality is a difficult endeavor. This relates, among other factors, to lack of sufficient research upon which to base implementation efforts. Alternative sources of evidence therefore need to be considered, particularly where organizational level EBP is the goal.
