Available again after a long absence! Always big on character and charm, Fiat 's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic 600 and Nuova 500 cars, this book tells the full story of these ' baby ' Fiats. Built, and exported to, many countries outside of the marque 's native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars ' tiny chassis by Italy 's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.

Information on routine servicing and repair for the DIY mechanic, with tasks described and photographed in a step-by-step sequence.

No auto show is complete without them. They're crowd pulling and invariably extravagant, zany, way-out, and created with no apparent consideration for cost. And, in the eyes of some, taste. But for all the entertainment value of the visually striking concept car, it does, nevertheless, have a serious role to play. For the car manufacturer it provides an invaluable opportunity to gauge the public's reaction to radical design initiatives before putting them into production. With environmental considerations moving increasingly to the fore, the newest generation of aerodynamically honed concepts is also of particular significance for featuring creative alternatives to the long-running internal combustion engine. This usually takes the form of emissions-free electric power which is either used in isolation or in

hybrid form, when it works in harmony with miserly fueled gas or diesel units. The concept car is now well over 50 years old, and author Jonathan Wood charts its evolution from General Motors' landmark Y-Job of 1939, through the dream cars of the 1950s, and so to the present day. This highly illustrated book will fascinate car enthusiasts of all ages and provide a pointer to the sort of vehicles that will be on our roads well into the 21st century and beyond.

Hatchback. Does not cover 500 Abarth or features specific to Convertible. Petrol: 1.1 litre (1108cc) & 1.2 litre (1242cc). Does not cover 0.9 litre Twinair or 1.4 litre petrol engines. Diesel: 1.3 litre (1248cc)

Does NOT cover 3.0 litre V6, turbo or 2.0 litre VSX 16-valve (150 bhp) petrol models. Diesel: 1.9 litre (1905cc), 2.0 litre (1997cc) HDi & 2.1 litre (2088cc) inc. turbo versions.

The anatomy theater is where students of the human body learn to isolate structures in decaying remains, scrutinize their parts, and assess their importance. Taking a new look at the history of anatomy, the author places public dissections alongside private ones to show how the anatomical theater was both a space of philosophical learning and a place where students learned to behave in a civil manner towards their teachers, their peers, and the corpse.
