Free to be Human shows how the 'filter' system described by Noam Chomsky and Edward Herman distorts our understanding of many personal, ethical and spiritual issues, ensuring that we remain passive, conformist, confused and uninformed and willing to accept the irrational values of corporate consumerism.

This Book Argues That, In Order To Counter The Continual Process Of Disinformation And Disempowerment, We Need To Master The Art Of Intellectual Self-Defence And So Become Able To Challenge The Deceptions Of A System That Subordinates People And Planet To The Drive For Profit.

The Intellectual Powers is a philosophical investigation into the cognitive and cogitative powers of mankind. It develops a connective analysis of our powers of consciousness, intentionality, mastery of language, knowledge, belief, certainty, sensation, perception, memory, thought, and imagination, by one of Britain's leading philosophers. It is an essential guide and handbook for philosophers, psychologists, and cognitive neuroscientists. The culmination of 45 years of reflection on the philosophy of mind, epistemology, and the nature of the human person No other book in epistemology or philosophy of psychology provides such extensive overviews of consciousness, self-consciousness, intentionality, mastery of a language, knowledge, belief, memory, sensation and perception, thought and imagination Illustrated with tables, tree-diagrams, and charts to provide overviews of the conceptual relationships disclosed by analysis Written by one of Britain's best philosophical minds A sequel to Hacker's Human Nature: The Categorical Framework An essential guide and handbook for all who are working in philosophy of mind, epistemology, psychology, cognitive science, and cognitive neuroscience

Collecting several key documents and policy statements, this supplement to the ninth edition of the Intellectual Freedom Manual traces a history of ALA's commitment to fighting censorship. An introductory essay by Judith Krug and Candace Morgan, updated by OIF Director Barbara Jones, sketches out an overview of ALA policy on intellectual freedom. An important resource, this volume includes documents which discuss such foundational issues as The Library Bill of Rights Protecting the freedom to read ALA's Code of Ethics How to respond to challenges and concerns about library resources Minors and internet activity Meeting rooms, bulletin boards, and exhibits Copyright Privacy, including the retention of library usage records

Contributions to a conference held in Zurich in 2006.

This book examines how intellectual property rights (IPR) affect the daily lives of individuals worldwide and how that may in turn impact the health and wealth of nations. While the protection of the intellectual endeavours of authors and inventors is vital for a fair and just society it is important that the IPR regime remains flexible enough to encourage creativity, innovation and the free flow of information and technology that are critical to the well being of billions of people, especially in the developing world. This work examines the implications of the IPR regime for basic human security. It examines the relationship between IPR regime and fundamental human rights, such as the right to education, health and food, and the broader right to development. This book will be of interest to IP scholars, international relations specialists and international security analysts, in particular those interested in non-traditional security issues. It may also serve as resource book for the international business community on developmental and human rights aspects of IP.

This work serves as a guide for developing policy, responding to censorship challenges, developing a materials section programme, dealing with pressure groups, and promoting access to all types of information for all types of users in the new millennium.
