Bill Ackman of Pershing Square Capital Management just made the greatest trade of all time (in my judgement ¶ based on the percentage gain, dollar profit, the speed of the gain, and the perfect timing). He made almost a 100x return in less than two months, turning a \$27 million investment into a \$2.6 billion profit!

In 2006, hedge fund manager John Paulson realized something few others suspected—that the housing market and the value of subprime mortgages were grossly inflated and headed for a major fall. Paulson's background was in mergers and acquisitions, however, and he knew little about real estate or how to wager against housing. He had spent a career as an also-ran on Wall Street. But Paulson was convinced this was his chance to make his mark. He just wasn't sure how to do it. Colleagues at investment banks scoffed at him and investors dismissed him. Even press skeptical about housing shield away from the complicated derivative investments that Paulson was just learning about. But Paulson and a handful of renegade investors such as Jeffrey Greene and Michael Barry began to bet heavily against risky mortgages and precarious financial companies. Timing is everything, though. Initially, Paulson and the others lost tens of millions of dollars as real estate and stocks continued to soar. Rather than back down, however, Paulson redoubled his bets, putting his hedge fund and his reputation on the line. In the summer of 2007, the markets began to implode, bringing Paulson early profits, but also sparking efforts to rescue real estate and derail him. By year's end, though, John Paulson had pulled off the greatest trade in financial history, earning more than \$15 billion for his firm—a figure that dwarfed George Soros's billion-dollar currency trade in 1992. Paulson made billions more in 2008 by transforming his gutsy move. Some of the underdog investors who attempted the daring trade also reaped fortunes. But others who got the timing wrong met devastating failure, discovering that being early and right wasn't nearly enough. How top traders made huge profits during the most momentous market events of the past century Financial and commodity markets are characterized by periodic crashes and upside explosions. In retrospect, the reasons behind these abrupt movements often seem very clear, but generally few people understand what's happening at the time. Top traders and investors like George Soros or Jesse Livermore have stood apart from the crowd and capitalized on their unique insights to capture huge profits. Engaging and informative, The Greatest Trades of All Time chronicles how a select few traders anticipated market eruptions?from the 1929 stock market crash to the 2008 subprime mortgage meltdown?and positioned themselves to excel while a majority of others failed. Along the way, author Vincent Veneziani describes the economic and financial forces that led to each market cataclysm and how these individuals perceived what was happening beforehand and why they decided to place big bets, often at great risk and in opposition to consensus opinion at the time. Traders discussed include George Soros, Jesse Livermore, Paul Tudor Jones, John Templeton, and John Paulson Provide contemporary traders and investors with insights on how great traders make great trades Offers insights on market forecasting, mass psychology, and the importance of personal conviction in trading At a time when many investors are looking to the past for answers to the future, this book brings important historical moments in the financial markets to life.

NEW YORK TIMES BESTSELLER Shortlisted for the Financial Times/McKinsey Business Book of the Year Award The unbelievable story of a secretive mathematician who pioneered the era of the algorithm—and made \$23 billion doing it. Jim Simons is the greatest money maker in modern financial history. No other investor—Warren Buffett, Peter Lynch, Ray Dalio, Steve Cohen, or George Soros—can touch his record. Since 1988, Renaissance's signature Medallion fund has generated average annual returns of 66 percent. The firm has earned profits of more than \$100 billion; Simons is worth twenty-three billion dollars. Drawing on unprecedented access to Simons and dozens of current and former employees, Zuckerman, a veteran Wall Street Journal investigative reporter, tells the gripping story of how a world-class mathematician and former code breaker mastered the market. Simons pioneered a data-driven, algorithmic approach that's sweeping the world. As Renaissance became a market force, its executives began influencing the world beyond finance. Simons became a major figure in scientific research, education, and liberal politics. Senior executive Robert Mercer is more responsible than anyone else for the Trump presidency, placing Steve Bannon in the campaign and funding Trump's victorious 2016 effort. Mercer also impacted the campaign behind Brexit. The Man Who Solved the Market is a portrait of a modern-day Midas who remade markets in his own image, but failed to anticipate how his success would impact his firm and his country. It's also a story of what Simons's revolution means for the rest of us.

Discover inspirational real-life stories of superstar athletes in this collection of sports biographies featuring LeBron James, Stephen Curry, Tim Howard, and more! Team USA goalkeeper Tim Howard was diagnosed with Tourette Syndrome in 6th grade. He went on to become a national treasure after single-handedly keeping America competitive in the 2014 World Cup. Stephen Curry was told he was too small, too weak, and too slow to even receive a scholarship to play college basketball. He outworked everyone and went on to become MVP of the National Basketball Association. Jim Abbott was born without his right hand, yet he refused to be defined by what he lacked. He went on to pitch a no-hitter in the Major Leagues. Athlete after athlete in this book found discipline, hope, and inspiration on the playing field, rising above their circumstances. ¶A lively, exciting, and definitely thought-provoking book.¶ ¶Booklist Things looked grim for American energy in 2006, but a handful of wildcats were determined to tap massive deposits of oil and gas that giants like Exxon and Chevron had ignored. They risked everything on a new process called fracking. Within a few years, they solved America's dependence on imported energy, triggered a global environmental controversy, and made and lost astonishing fortunes. No one understands the frackers'⁠their ambitions, personalities, and foibles⁠better than Wall Street Journal reporter Gregory Zuckerman. His exclusive access drives this dramatic narrative, which stretches from North Dakota to Texas to Wall Street.

"An inspiring and informative page-turner." ¶Walter Isaacson Longlisted for the FT/McKinsey Business Book of the Year Award The authoritative account of the race to produce the vaccines that are saving us all, from the #1 New York Times bestselling author of The Man Who Solved the Market Few were ready when a mysterious respiratory illness emerged in Wuhan, China in January 2020. Politicians, government officials, business leaders, and public-health professionals were unprepared for the most devastating pandemic in a century. Many of the world's biggest drug and vaccine makers were slow to react or couldn't master an effective response. It was up to a small group of unlikely and untested scientists and executives to save civilization. A French businessman dismissed by many as a fabulist. A Turkish immigrant with little virus experience. A quirky Midwesterner obsessed with insect cells. A Boston scientist employing questionable techniques. A British scientist despised by his peers. Far from the limelight, each had spent years developing innovative vaccine approaches. Their work was met with skepticism and scorn. By 2020, these individuals had little proof of progress. Yet they and their colleagues wanted to be the ones to stop the virus holding the world hostage. They scrambled to turn their life's work into life-saving vaccines in a matter of months, each gaining to make the big breakthrough⁠and to beat each other for the glory that a vaccine guaranteed. A #1 New York Times bestselling author and award-winning Wall Street Journal investigative journalist lauded for his ⁠bravura storytelling⁠ (Gary Shynegart) and ⁠first-rate⁠ reporting (The New York Times), Zuckerman takes us inside the top-secret laboratories, corporate clashes, and high-stakes government negotiations that led to effective shots. Deeply reported and endlessly gripping, this is a dazzling, blow-by-blow chronicle of the most consequential scientific breakthrough of our time. It's a story of courage, genius, and heroism. It's also a tale of heated rivalries, unbridled ambitions, crippling insecurities, and unexpected drama. A Shot to Save the World is the story of how science saved the world.

The first book of its kind: a fascinating and entertaining examination of hedge funds today Shortlisted for the Financial Times/Goldman Sachs Business Book of the Year Award The New York Times bestseller

October 28, 1997. The Dow drops 500 points. Investors the world over receive a startling reminder that "what goes up, must come down." It is a profoundly unsettling experience for those of us who have either forgotten or have never known the experience of a bear market. Half of the money invested in U.S. stocks in this century entered the market from 1991-1996, making the dark days of October memorable for their bloodletting. Overall, this was just a scratch, and despite the optimism of so many investors, history has shown that the bear attacks time and time again. John Rothchild, critically acclaimed author of the bestselling A Fool and His Money, isn't even afraid to face a full-fledged bear market. In his topical and timely new book, Rothchild reveals how to prepare psychologically and tactically for the looming debacle. Breaking from the pack of investment books which tacitly assume a bull market, The Bear Book focuses on protecting assets and minimizing losses during a bear market and on taking advantage of unique opportunities for profit. With customary flair and style, Rothchild chronicles the long history of bear markets, exploring in detail exactly what constitutes a bear market and how it affects us. Along with his own expertise, the author draws on respected and knowledgeable names such as Jim Rogers, Jim Grant, and Martin Zweig, among a host of prominent investment advisors, strategists, and fund managers. The result is a comprehensive chronicle that deftly and definitively fills the "bearish information gap." John Rothchild's masterful penchant for blending wit, good storytelling, and sound investment analysis makes The Bear Book both informative and vastly entertaining. He distinguishes the characteristics of past bear markets, examining what triggered them, how long they lasted-and why. He probes the unique psychology of bearish investing, concentrating on which types of investments generally do well during a downturn in the market. His often surprising answers to some straightforward, no-nonsense questions clarify, among other key issues, what can happen to mutual funds in a bear market, and exactly what the dangers are of selling short. Of critical importance is Rothchild's overview of the alternatives to stocks, including gold, bonds, and money market funds, as well as tips on what stocks to buy when the market starts to turn bullish again. For historical perspective, The Bear Book also includes a unique and eye-opening account of the Crash of '29 and its survivors. Profiles of prominent bearish investors-Roy Neuberger and Philip Carret, among them-contains illuminating long-term perspectives on the ups and downs of the stock market over the past fifty to seventy-five years. A bracing tonic for investors at all levels of experience, The Bear Book offers a veritable blueprint of the various stages of a typical bear market. It will prove invaluable to those of us who wish to protect our savings- and peace of mind -whenever the market drops.
