Building number relationships and number sense can be a struggle. According to the common core standards, students in the 1st grade should be able to count to 120. By 2nd grade students are expected to understand multi-digit numbers up to 1,000. For struggling students, there is a huge number sense gap that needs to be filled.

*3 Math Routines to Build Number Sense - Mr Elementary Math*

It wasn't until I read Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3 .by Jessica F. Shumway, that I truly understood what number sense was and found ways I could support that understanding in my classroom. Since reading the first chapter of the book, I have incorporated a number routine in my daily schedule, and from the very first one, I have seen my students' understanding of numbers become one of their greatest strengths.

Students who never develop strong number sense will struggle with nearly all mathematical strands, from measurement and geometry to data and equations. In Number Sense Routines, Jessica shows that number sense can be taught to all students. Dozens of classroom examples -- including conversations among students engaging in number sense routines -- illustrate how the routines work, how children's number sense develops, and how to implement responsive routines.

The daily use of these quick five-, ten-, or fifteen-minute experiences at the beginning of math class will help build students' number sense. Students with strong number sense understand numbers, ways to represent numbers, relationships among numbers, and number systems. They make reasonable estimates, compute fluently, use reasoning strategies (e.g., relate operations, such as addition and subtraction, to each other), and use visual models based on their number sense to solve problems.
