Award for Best in Self-Help and Business"Excellent. Wonderful Book!"--Corry Ballas (father of Mark Ballas, Derek and Julianne Hough) of Dancing with the Stars"Of Love, Friendship, Autonomy & Wealth" is not your ordinary self-help book. It combines anecdotes we will all recognize from everyday life, with deep philosophical questions, scientific quandaries, and business examples ranging from Ford to McDonald's to JP MorganChase. Authors McCarty and Herlache have issued a heartfelt call for passion, purpose, and ethics in both the business and personal worlds."--Fran Hawthorne, Former Editor for Fortune and BusinessWeek"Patrick is without doubt an extraordinary talent."--Dr. David Ingram, Loyola University" find [McCarty's] perspective on issues refreshing and without parallel."--C. Payne Lucas, Chair of Democratic Party of South Carolina"McCarty has a gift for explanation, even of the most difficult of subjects."--Dr. Adrian Peperzak, Stanford University"(McCarty) teaches students how to learn while teaching them the subject."--Dr. Hent de Vries, Johns Hopkins University"As celebrated economist Jeffrey D. Sacks has argued, there will be no return to prosperity in the absence of mindfulness, citizens who acquire the self-awareness to live as they ought. Patrick McCarty--award-winning author, 25-year university professor and radio personality--provides the means for the cultivation of mindfulness, a roadmap to joyous living, new horizons of possibility and financial prosperity. This is not your average self-help book. McCarty permits the reader to listen in on his conversations with a McDonald's CEO, an editor of Psychology Today, a writer for Fortune magazine, and other pioneers in contemporary thought. This book is a tour de force of erudition and psychological insight, all in the context of present-day globalization and techno-capitalism. This is a book to savor, to keep on hand always. It is a transformative reading experience, superbly written."Includes interviews with:Raymond Ku, former CEO of McDonald's-Taiwan-Carlin Flora, Editor with Psychology Today and Author of Friendfluence-Fran Hawthorne, Editor with Fortune, Author of Ethical Chic: The Inside Story of the Companies We Think We Love(named one of the Best Business Books of 2012 by Library Journal)

Autonomy: Capital, Class and Politics explores and critiques one of the most dynamic terrains of political theory, sometimes referred to as 'Autonomist Marxism' or post-Operaismo. This theory shot to prominence with the publication of Empire by Hardt and Negri and has been associated with cutting edge developments in political and cultural practice; yet there exists no work that critically examines it in its contemporary breadth. Taking three divergent manifestations of Autonomist Marxism found in the works of Antonio Negri and Paulo Virno, the Midnight Notes Collective and John Holloway, David Eden examines how each approach questions the nature of class and contemporary capitalism and how they extrapolate politics. Not only is such juxtaposition both fruitful and unprecedented but Eden then constructs critiques of each approach and draws out deeper common concerns. Suggesting a novel rethinking of emancipatory praxis, this book provides a much needed insight into the current tensions and clashes within society and politics.

Amazed at the stubborn nature of the sexual division of labour in modern society, five Norwegian researchers set out to explore the sources of this pervasive resistance to change. Moving from the neutral concepts of work and money, the lofty notions of love and family and the triviality of domestic organization, social science is made to yield some surprising insights into hidden, secret and perhaps even sacred structures of everyday life. A provocative claim in these pages is that the practical arrangement in the family is informed by the erotic properties of work and semi-religious notions of poverty and dirt - and is sustained by both sexes. This anthology reveals some perplexing aspects of contemporary self-understanding and rediscovers sexual meaning as a pillar of modern culture. The book is an invitation to reconsider the conditions for gender equality and to explore further the cultural tangle behind this persistent tolerance for injustice within European thinking.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

This book examines the importance of work in human well-being, addressing several related philosophical questions about work and arguing on the whole that meaningful work is central in human flourishing. Work impacts flourishing not only in developing and exercising human capabilities but also in instilling and reflecting virtues such as honor, pride, dignity, self-discipline and self-respect. Work also attaches to a sense of purposefulness and personal identity, and meaningful work can promote both personal autonomy and a sense of personal satisfaction that issues from making oneself useful. Further still, work bears a formative influence on character and intelligence and provides a primary avenue for exercising complex skills and garnering esteem and recognition from others. The author defends a pluralistic account of meaningful work, arguing that work can be meaningful in virtue of developing capabilities, supporting virtues, providing a purpose, or integrating elements of a worker's life. In light of the impact of meaningful work on living well, the author argues that well-ordered societies provide opportunities for meaningful work, that individuals would be well advised to pursue these opportunities, and that the philosophical view of value pluralism, which casts work as having no special significance in an individual's life, is false. The book also addresses oppressive work that undermines human flourishing, examining potential solutions to mitigate the impact of bad work on those who perform it. Finally, a guiding argument of the book is that promoting meaningful work is a matter of ethics, more so than a matter of politics. Prioritizing people over profit, treating workers with respect, respecting the intelligence of working people, and creating opportunities for people to contribute developed skills are basic ethical principles for employing organizations and for communities at large.

Revised papers from a conference under the auspices of the Western Center of the American Academy of Arts and Sciences which was held May 8-9, 1977 at the Center for Advanced Study of the Behavioral Sciences in Palo Alto, California.

The forces that shaped the institution of slavery in the American South endured, albeit in altered form, long after slavery was abolished. Toiling in sweltering Virginia tobacco factories or in the kitchens of white families in Chicago, black women felt a stultifying combination of racial discrimination and sexual prejudice. And yet, in their efforts to sustain family ties, they shared a common purpose with wives and mothers of all classes. In Labor of Love, Labor of Sorrow, historian Jacqueline Jones offers a powerful account of the changing role of black women, lending a voice to an unsung struggle from the depths of slavery to the ongoing fight for civil rights.

"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things--mostly about money and investing--she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach. Businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!

With economic, political and cultural globalisation, our world is inseparable from the fates of other nations and peoples. But how far can we trust English to provide us with a reliable lingua franca to speak about our world? If our keywords reflect our cultures and form parts of specific cultural and historical narratives, they may well help trace the paths we take together into the future. This book seeks the roots of four keywords for our times: the people, the citizen, the individual, and Europe. By exploring these keywords in English and understanding stories related to 'equivalent keywords' in Chinese, German, French and Czech, this book helps us to understand how other languages are adapting to English words, and how their worldviews resist 'anglo-concepts' through their own traditions, stories and worldviews.

In this book, Miguel Basáñez presents a provocative look at the impact of culture on global development. Drawing on data from governments, NGOs, the World Values Survey and more addressing over one hundred countries, he argues that values, as the "building blocks" of culture, are directly related to the speed with which social, cultural and economic development occurs. Basáñez utilizes quantitative survey data to delineate three cultural hyperclusters across the globe: cultures of honor, which prioritize political authority; cultures of achievement, which emphasize economic advancement; and cultures of joy, which focus on social interactions. According to Basáñez, these cultures evolved chronologically, mirroring the development of agrarian, industrial and service societies. He argues that a country's developmental path is profoundly influenced by its people's values and culture, as crystallized through its formal and informal governing institutions. Culture is passed down over generations through families, schools, the media, religious institutions, leadership, and the law. Although culture and values are in a permanent state of evolution, leaders and policymakers can also push cultural change in order to promote desirable goals such as economic growth, democratization, and equality. Over the course of the book, Basáñez introduces two new measures of development: the Objective Development Index (which blends rubrics such as health, education, income, gender equality, political rights and civil liberties, and economic inequality) and the Subjective Development Index (which uses responses to the World Values Survey to classify countries according to their values).
