Database Security - Data Protection and Encryption | Oracle

Rigorous internal processes and use of effective security controls in all phases of cloud service development and operation. Adherence to Oracle's strict security standards through third-party audits, certifications, and attestations. Oracle helps customers demonstrate compliance readiness to internal security and compliance teams, their customers, auditors, and regulators.

Oracle Cloud Infrastructure Security Guide

Oracle Database features tools to help maintain password security, some of which are disabled by default, so you'll want to make sure they're enabled for strong security. One is the built-in checkpwd password cracker. Checkpwd scans users' local password hashes and compares them against a dictionary file, thereby identifying accounts with weak passwords.
