as masters of the language. It is for both the teachers and self-motivated students. This is the 1st volume of the series, covering the 1st 100 most frequently used Chinese characters as presented with their full colour illustrations and arranged in columns from right to left on the front cover. For its extensive colour illustrations throughout, this book is best read with a colour screen reader.

This volume constitutes the revised selected papers of the 15th International Conference on Bio-inspired Computing: Theories and Applications, BIC-TA 2020, held in Qingdao, China, in October 2020. The 43 full papers presented in both volumes were selected from 109 submissions. The papers are organized according to the topical headings: evolutionary computation and swarm intelligence; neural networks and machine learning; DNA computing and membrane computing.

Over recent years biographical studies have gained an increasingly important place in academic study. The two are inextricably linked. Education uses biography in teaching, and in biography, education features strongly as a formative stage in personal development. This book elaborates on the analytical work that has drawn attention to biography and education, and seeks to expand the understanding of lives in educational

contexts. Mainstream sociology has been quick to embrace this treatment of individuals as biographical appearances, but it is even more relevant in the field of education.

This is a descriptive analysis of the results of a multi-method research study which utilized both qualitative and quantitative techniques to study the student culture at Saint Leo College. The work describes the college student culture in detail: its mores and customs; its beliefs, values and attitudes; its pattern of daily life; its developmental phases; and the interpersonal relationships among members of the culture.

Cut through the noise and make better college and career choices This book is about addressing the college-choosing problem. The rankings, metrics, analytics, college visits, and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make. They don't give students and families the information and context they need to make such a high-stakes decision about whether and where to get an education. Choosing College strips away the noise to help you understand why you're going to school. What's driving you? What are you trying to accomplish? Once you know why, the book will help you make better choices. The research in this book illustrates that choosing a school is complicated. By constructing more than 200

mini-documentaries of how students chose different postsecondary educational experiences, the authors explore the motivations for how and why people make the decisions that they do at a much deeper, causal level. By the end, you'll know why you're going and what you're really chasing. The book: Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what's next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college, but what "Job" students are hiring college to do for them.

This unique hands-on guide uses a highly effective case approach to explore specific, reality-based examples of the complex, controversial, and difficult ethical issues that students face on college campuses today—e.g., plagiarism, racism and hate speech, date rape, alcohol abuse. Then, through thought-provoking questions and critical discussions, prods readers to explore their own positions, notions, and opinions, and to justify their stances. It shows them how five important ethical principles can be used to think through these problems and to solve them in ethical dialogues. Academic Integrity, Grading, and Cheating. Tolerance, Diversity, and Hate
