Sometimes "Till death do us part" just doesn't apply to soulmates. When Adrian Cattrel first met Jake Riley, she thought he was a conceited road crew worker whose only redeeming quality was his unnaturally stunning blue eyes. But the more she got to know him, the more she realized there was just something about him she couldn't resist. Four years later, Adrian is a budding photographer and happily married to Jake. They're on their way home from a family dinner one night when tragedy suddenly strikes. Now Adrian is transitioning between two worlds and is concerned about how Jake will cope with her death. She knows he is not the kind of man to show his feelings—that's just not the way he was raised. His father taught him that real men—Riley men—never do that, but Adrian has tried to convince him otherwise right up until the night of her death. Now the stakes are much higher. Can Adrian with help from another unlikely guardian angel change her husband's mind, or will he continue to live up to his father's expectations, which could ultimately destroy him? As Adrian adjusts to her new role, she discovers that more than one person needs healing and that life still holds many surprises for her even though she's no longer a part of it. "The Last Photograph is a beautiful story of love, grief, and healing. I cared deeply about the characters, and several surprises kept me turning the page until the very satisfying conclusion." - Tyler R. Tichelaar, Ph.D. and award-winning author of Spirit of the North: A Paranormal Romance

How realistic is peace in the Middle East? Certainly there appears to be a reduction in conflict, and concrete improvements are clearly visible: the Gulf War opened the door to regional realignments that paved the way for the PLO-Israel peace agreement, which in turn made peace negotiations possible between Israel and Syria; Lebanon is rebuilding its cities following a cessation of its civil war; Iran has evidenced signs of a rapprochement with the West.Yet some analysts predict that these changes are doomed to failure. With its longstanding territorial disputes and pronounced ethnic and religious divides, will this troubled region ever resolve its conflicts? Pessimists further contend that vexed problems such as gender relations and human rights violations remain unaffected by the processes of international political readjustment.This provocative and interdisciplinary book tackles these controversial questions from a wide range of perspectives in an effort to unravel the complexities of this exciting area, which is the spotlight of tremendous global concern -- never more so than at the present.

Although Beecher takes issue with the call for women's active involvement in the abolition movement, her discussion reveals the inter-relationship between 19th century abolitionism and 19th century feminism.

Veterinary Clinical Pathology: A Case-Based Approach presents 200 cases with questions for those interested in improving their skills in veterinary clinical pathology. It emphasises an understanding of basic pathophysiological mechanisms of disease, differential diagnoses and recognition of patterns associated with various diseases or conditions. Topics discussed include haematology, clinical chemistry, endocrinology, acid-base and blood gas analysis, haemostasis, urinalysis, biological variation and quality control. Species covered include the cat, dog and horse, with additional material on ruminants. Cases vary in difficulty, allowing beginners to improve their clinicopathologic skills while more complicated cases, or cases treating unfamiliar topics, are included for experienced readers. This book is a helpful revision aid for those in training as well as for those in practice who are pursuing continuing education. It is also a valuable resource for veterinary nurses and technicians.
