This book is an illustrated guide to assistive technologies and devices (AT/AD). It chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. In general, AT can include mobility devices such as walkers and wheelchairs, as well as hardware, software, and peripherals that assist people with disabilities in accessing computers or other information technologies. Advanced AT has coincided with the advent of personal electronic devices that could be customized for use, such as computers and smart phones. For people with disabilities, AT includes simple gadgets for the home and office, electronic gadgets and complex computer systems for the workplace, mobility aids and accessible vans for getting around and modified equipment for lifestyle needs, such as talking ATMs and strobe light alarm systems. This book empowers people with disabilities to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles—even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient services. This handbook is a much-needed, comprehensive engineering guide to the dynamic world of today's digital consumer electronics. It provides complete details on key enabling technologies, standards, delivery and reception systems, products, appliances and networking systems. Each chapter follows a logical progression from a general overview of each device, to market dynamics, to the core technologies and components that make up that particular product. The book thoroughly covers all of the key digital consumer product categories: digital TV, digital audio, mobile communications devices, gaming consoles, DVD players, PCs and peripherals, display devices, digital imaging devices, web terminals and pads, PDAs and other handhelds, screenphones/videophones, telematics devices, eBooks and readers, and many other current and future products. To receive a FREE daily newsletter on displays and consumer electronics, go to: http://www.displaydaily.com/ -Surveys crucial engineering information for every digital consumer product category, including cell phones, digital TVs, digital cameras, PDAs and many more—the only reference available to do so -Has extremely broad market appeal to embedded systems professionals, including engineers, programmers, engineering managers, marketing and sales personnel—1,000,000+ potential readers -Helps engineers and managers make the correct design decisions based on real-world data

Articles, charts, lists, photographs and illustrations to help you eliminate confusion and uncertainty about topics such as stocking your kitchen, talking about your health, straightening up your home office, taking, editing, storing and sharing digital photos, doing laundry, preparing a home emergency kit and buying electronic gadgets for you car.

Digital technology is touching all aspects of our lives from cell phones to digital cameras. Going digital can be exhilarating for some, but stressful for others. Deciding on the right digital product can be difficult when you look at all the choices that are available in the market place. The new edition of Consumers' Report Digital Buying Guide 2006 can guide consumers in selecting a digital product and easing their anxieties about their purchase. The experts provide hundreds of smart ways to: "Save money and find the best values in computers, plasma televisions, cell phones, cameras, DVD players and more "Get the right high speed Internet connection or go wireless "Establish a communication link between your home computers (networking) "Weeding out spam and protecting your computer from security and privacy threats "Shoot, enhance, and send digital pictures by email "Download music from the internet "Create a home theater with high-definition TV "Enjoy the latest video games online of off "Plus: Exclusive e-Ratings of the best shopping websites

A diagnosis of Parkinson's disease is as disorienting as it is devastating. The Complete Guide for People With Parkinson's Disease and Their Loved Ones helps make sense of what comes next and what can be done, not just for those suffering from the disease but for their family and friends as well. A trained nurse and primary caregiver for her mother, who was diagnosed with Parkinson's disease in 1991, Lianna Marie draws upon over twenty years of education, research, and direct experience. Written in straightforward and easily accessible language, this essential guide aims to help patients better understand their role in their treatment so that they may continue to lead happy and hopeful lives. Topics covered include nutrition and exercise, alternative and complementary therapies, medication and treatment, and what caregivers can do to help. Written by an international expert on Parkinson's who has confronted the disease firsthand, The Complete Guide serves as the go-to book for comprehensive, easy-to-understand information for all Parkinson's patients and their loved ones.

MODERN BUSINESS STATISTICS, 5E allows students to gain a strong conceptual understanding of statistics with a balance of real-world applications and a focus on the integrated strengths of Microsoft Excel 2013. To ensure student understanding, this best-selling, comprehensive text carefully discusses and clearly develops each statistical technique in a solid application setting.Microsoft Excel 2013 instruction, which is integrated in each chapter, plays an integral part in strengthening this edition's applications orientation. Immediately after each easy-to-follow presentation of a statistical procedure, a subsection discusses how to use Excel to perform the procedure. This integrated approach emphasizes the applications of Excel while focusing on the statistical methodology. Step-by-step instructions and screen captures further clarify student learning.A wealth of timely business examples, proven methods, and additional exercises throughout this edition demonstrate how statistical results provide insights into business decisions and present solutions to contemporary business problems. High-quality problems noted for their unwavering accuracy and the authors' signature problem-scenario approach clearly show how to apply statistical methods to practical business situations. New case problems and self-tests allow students to challenge their personal understanding. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book constitutes the refereed proceedings of the 9th IFIP-TC6 Networking Conference, Networking 2010. Papers were solicited in three broad topic areas: applications and services, network technologies, and internet design. All papers were considered on their merits by a uni?ed Technical ProgramCommittee (TPC); there was no attempt to enforce a quota among topic areas. We believe the resulting program is an excellentrepresentationofthebreadthofrecentadvancesinnetworkingresearch. This year, the conference received 101 full paper submissions from 23 co- trisions?vecontinents,reflectingastrongdiversityinthenetworkingcommunity. Similarly, the 92 members of the TPC are from 21 countries and include a mix of academic, industry, and governmental a?liations. The TPC members, aided by some 50 external reviewers, provided a total of 470 reviews and follow-up discussions totaling more than 200 messages. The ?nal selections were made at a TPC meeting hosted by Columbia University in New York City, with both in-person and remote participation. In total, authors of accepted papers have academic and industry a?liations in 15 countries. We ?nally selected 24papers for presentationduring the conference technical sessions. A small number of papers were assigned a shepherd from the TPC to assist in paper revision. These statistics represent an acceptance rate of just under 24%, comparable to that of previous years. The TPC also identi?ed several papers that re?ect particularly promising early results; these papers were selected for presentation as work-in-progress papers and are identi?ed as such in the proceedings.
